2021 Bird Count, due to COVID-19, was done individually, except for one group, and included observation from 3 days: May 7, **May 8**, May 9.

Participants (24) emailed their list of species.																		
Black-bellied Plover was spotted on Mitlenatch Island in 2021 and is not included in 2021 species count.																		

2020 Bird Count was done in a different way due to COVID-19. Participants (42) emailed in their individual observations for the 24 hour period.

Due to bad weather the count was extended for a second day.																		
---	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

2004-2019 Bird Counts were conducted mainly with participants together in one group from 9 a.m. to 4 p.m. Individuals also contributed sightings for the 24 hour period.
