2004-2019 Bird Counts were conducted mainly with participants together in one group from 9 a.m. to 4 p.m. Individuals also contributed sightings for the 24 hour period.																				
2020 Bird Count was done in a different way due to COVID-19. Participants (42) emailed in their individual observations for the 24 hour period.																				
Due to bad weather the count was extended for a second day.																				
2021 Bird Count, due to COVID-19, was done individually, except for one group, and included observation from 3 days: May 7, May 8 , May 9.																				
Participants (24) emailed their list of species.																				
Black-bellied Plover was spotted on Mitlenatch Island in 2021 and is not included in 2021 species count.																				
2022 Spring Bird Count was done mainly by individuals. Some people connected to form family or friends groups. Three days were included: May 6, 7 , and 8.																				
2023 Main group - Nancy Kendel; Whaletown, Carrington, Children's Forest - Christine Robinson. Three days included: May 6, 7, 8. Nice, sunny weather. 24 participants.																				
Spotted Sandpiper added to the list. And confirmed Eared Grebe.																				
Red font, red check mark - first time on our list.
